CAREER OBJECTIVE

Computer Engineering student passionate about Java, full-stack development, and AI. Continuously learning and improving technical skills to build scalable real-world applications.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript

Frontend: React, Next.js, HTML, CSS

Backend & Frameworks: Spring Boot, Flask, FastAPI

AI / Computer Vision: OpenCV, NLP

Tools & Platforms: Firebase, MySQL, PostgreSQL, Git, Postman, VS Code, Vercel

EDUCATION

B.Tech – Computer Engineering | CGPA: 7.70 / 10

Lokmanya Tilak College of Engineering 2025 – 2028

Diploma – Computer Engineering | 85.89%

Navjeevan Education Society's Polytechnic, Bhandup 2022 – 2025

SSC (X) – Maharashtra State Board | 73.00%

St. John The Baptist High School 2022

INTERSHIP EXPERIENCE

Applied AI Intern – AICTE & IBM SkillsBuild (CSRBOX Foundation)

Dec 2025 – Jan 2026

- Completed a 6-week Applied AI internship; built and evaluated 3+ ML models using Python, scikit-learn, and IBM Watson tools.
- Improved model accuracy through iterative feature engineering and hyperparameter tuning on real-world datasets.

Python Development Intern – Resonit (Virtual)

May 2024 – Jul 2024

- Leveraged Pandas and NumPy to clean, preprocess, and structure datasets of 50,000+ records for backend pipelines.
- Integrated processed data into dashboard modules, reducing manual reporting effort by streamlining data workflows.

PROJECTS

AI Symptom Checker | Dec 2025 – Jan 2026 [Live](#)

Developed an AI-powered hospital system using NLP to analyse patient symptoms in real time, classify severity across 3 levels, and route patients to appropriate care.

Dropout Defender | Dec 2024 – Feb 2025 [Live](#)

Built an ML-powered web application using Logistic Regression and Random Forest achieving 87%+ prediction accuracy to identify and reduce student dropout risk.

CaairMate – Healthcare App | Jan – Apr 2025

Engineered a full-stack healthcare platform enabling appointment booking, digital prescription management, and real-time health tracking for patients and doctors.

HACKATHONS & COMPETITIONS

CODEBYTE 2.0 – LTCOE

Advanced to the final round (top 20 of 90+ teams); developed "DHANX," a digital investment platform, within a 24-hour sprint.

Web Debugging – NEXUS'26, VJTI

Placed 8th among 40 teams by diagnosing and resolving broken logic and performance bottlenecks across multiple web stacks.

VEGA Hackathon – Pratishtha, SAKEC

Designed and delivered "GovLens," an Open Government Data AI dashboard, using React, FastAPI, and Supabase within strict time constraints.

CERTIFICATIONS & ACTIVITIES

Web Development Certification – Internshala | Dec 2023 – Feb 2024

Earned an 8-week certification covering HTML, CSS, Bootstrap, DBMS, PHP, JavaScript, and React; built a final capstone project.

Inter-College Debate – NESF

Represented the college at an inter-college debate competition, demonstrating strong communication and analytical skills.

Event Associate – Pravah, LTCOE

Coordinated logistics and technical execution for a 200+ attendee campus event; recognised for leadership and delivery.
